

## Frontend Developer Test

You are now invited to perform a technical skill assessment. The requirement is to build a single-page dashboard Todo-app. You will have 5 days starting from the day you receive this test. Please refer to the guide below for your next steps.

### Step 1:

You can use either Vanilla.js (ES5/ES6) or React.js framework to build the app.

### Step 2:

You should use LocalStorage to save and display all added tasks.

### Step 3:

You can use Bootstrap, Material Design or any other frontend framework, but the app's design must be same as Picture 1 and 2 on the next page.

### Step 4:

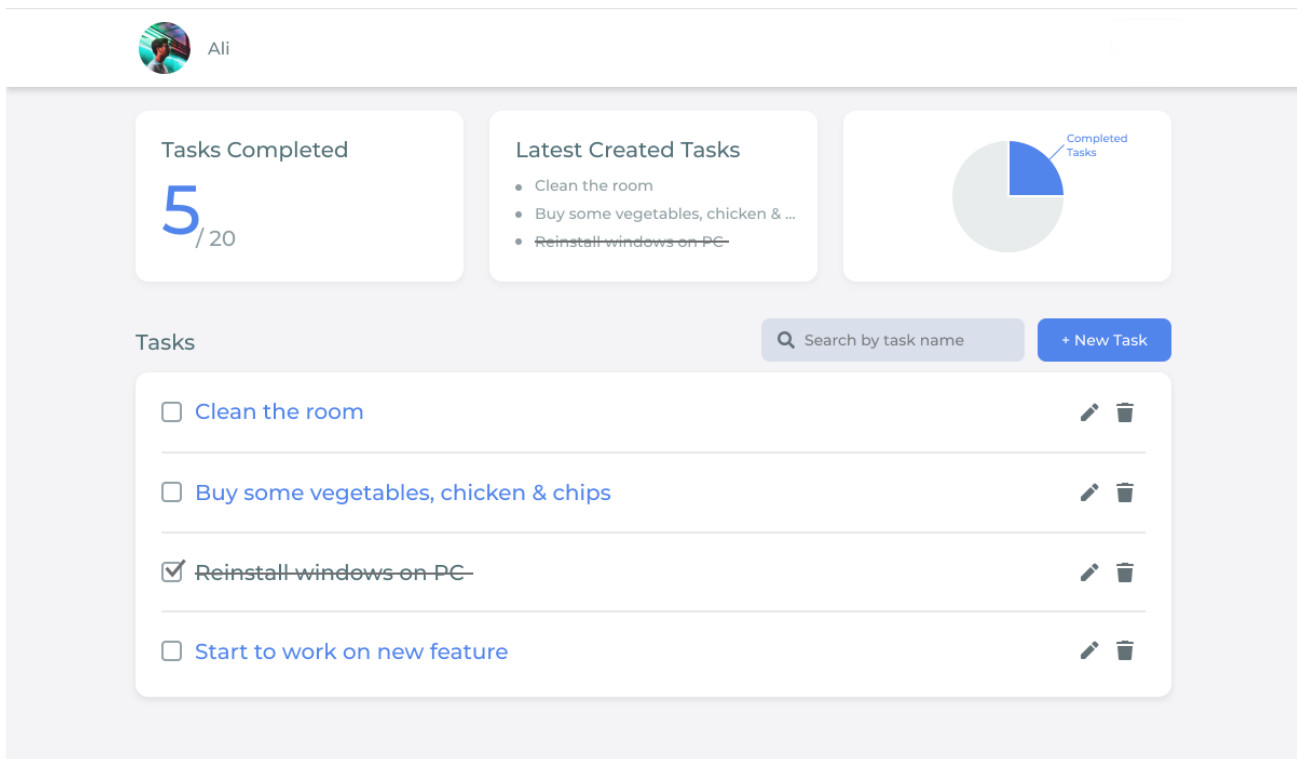

The app must have functionalities such as ADD, EDIT, DELETE and SEARCH tasks.

### Step 5:

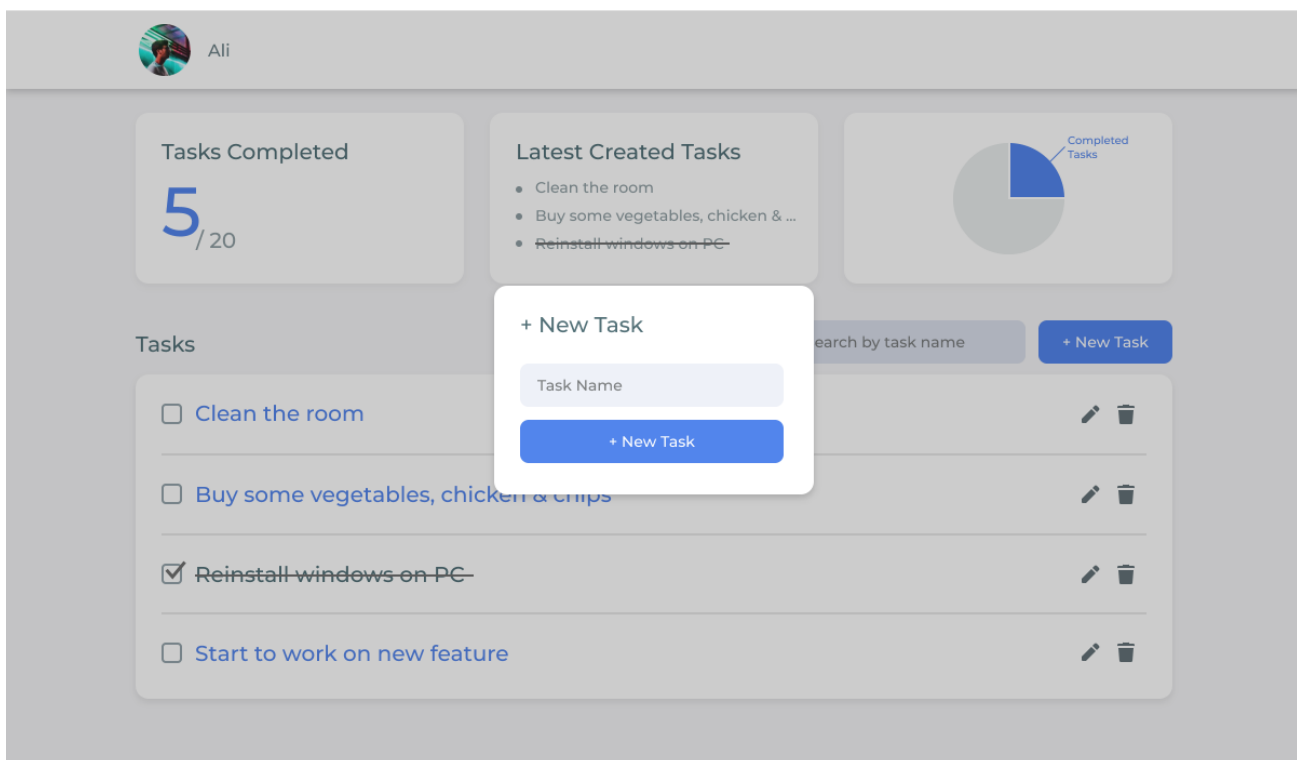

Once completed, push it to Github and send us the URL to your project repository together with brief instructions.

### *Bonus Tips:*

1. *Responsive design (iPad and Mobile).*
2. *Clean code and comments.*
3. *Deploying your app somewhere.*
